

Phillipp Zarindast

Frontend Web Developer

cophi.dev@gmail.com
+49 176 47838232

Hamburg, Germany

Profile

As a Frontend Developer I love to solve problems, learn new things and have a great passion for design. In my career I have strengthened my ability to always find a solution for every problem and think outside of the box. As an Engineer I know how to deal with stressful situations and always remain calm. My role as a community manager and partner of a New Yorker startup proof my ability to work in a team and I can't wait to truly begin this journey as a Frontend Web Developer.

Employment History

Partner & Community Manager NFT Project at Two Bit Bears, New York City / remote

10/2021–Present

As the community manager of a highly anticipated NFT project, I was able to build a strong foundation of great people and supporters. My goal is to make everybody feel comfortable and welcome, share news and educate people about the NFT space.

Scheduling timelines, coming up with social media campaigns and strategizing the further process of the project became daily business to me.

Traffic Light Engineer at City Government, Hamburg

02/2020–07/2022

As a Infrastructural Engineer, it was my response to analyze intersections and write the program of new traffic light software. I achieved to become the manager of the city's biggest hardware & software update with over 100 intersections being affected and optimized the schedule so we were able to shorten the estimated end of the project by about 20%.

Sales Consultant at Daikin Airconditioning, München

2019–2020

Acquiring new customers and projects and creating concepts for air conditioning systems for large projects. I introduced our team to a new way to analyze the relationships to our customers based on a visual model of important attributes, that lead to an increase in customers and sales.

Skills

React
JavaScript
HTML5
CSS
Git
Figma
Web3 & NFT knowledge
Discord bots & security

Courses

CS50 Introduction to Computer Science at University of Harvard
07/2021–12/2021

build and deploy an NFT collection with DAO interface at _buildspace
2022–2022

React basics at Scrimba
02/2022–03/2022

Modern responsive web design at freecodecamp
06/2022–Present

**Product Development Software at IB&T Software
Company, Norderstedt**

2018–2019

Quality assurance of new software features. I was testing new functionalities and reported bugs and recommendations to the developers. With my help we were able to ship one of the latest innovations on the engineering software market.

Education

MS, Hafencity Universität Hamburg

2018–2020
