PROFILE

As a Frontend Developer I love to solve problems, learn new things and have a passion for details and design. My past work experiences have strengthened my organized way of working. As an Engineer I know how to deal with stressful situation and always remain calm and solution-oriented. My background in sales as well as my emotional intelligence make me a great team player. My whole life I have been learning things on my own alongside great teachers and I can't wait to truly begin this journey as a Frontend Web Developer

---
